

Electronic Data Capturing System

- **Truthy** an Electronic data **Capturing, Authenticating, Integrating and Saving SYSTEM.**
- **Truthy** share records to all connected Equipments. A powerful security and perpetual data processing feature
- **Truthy** combines captured and administrative data to form a unique, authentic, integrated and legal TRX record
- **Truthy** operations, eliminates any human direct interventions, therefore
- **Truthy** secures and present authentic integrated Data [Information]. Therefore all
- **Truthy** documents such as DN, GRN, Sales, Transfer, Orders and all other are 100% system generated.

Best Business Implementation

- -Manufacturing [Storage/Production Transfers]
- -Warehousing/Silos [Grain and Loose Cargo]
- -Construction
- -Mining And Query
- -Farming
- -Bakery and Confectionary
- -Transport and Logistics
- -Hospitals and Laboratories
- -Weighbridge Services Providers/ Government/NTSA/Borders
- -Vessel Discharging Exercise at the Port

Administrative Features

- 1) Multiple Weighbridge Integration Configuration [Sharing information [Data] On]
- 2) Storage Locations(Silos/Warehouse) Maintenance
- 3) Commodities/Stock Items Maintenance
- 4) Commodities/Stock Items Selling And Buying Prices Maintenance
- 5) Importers/Customers Maintenance
- 6) Transport Companies Maintenance

Operational Features

- 7) Direct Importer[Customer] Commodity Receiving
- 8) Direct Commodity Purchases
- 9) Direct Commodity Sales
- 10) Direct Commodity Transfer [To production/Other Location]
- 11) Third Party Commodity Release Order
- 12) Direct Third Party Commodity Loading
- 13) Direct Weighbridge Transaction Posting

Reporting Features

- 14) Delivery Notes Reports
- 15) Good Receiving Notes Report
- 16) Commodity In and Out Movement Report
- 17) Commodities Balance Report
- 18) Importer/Customer Commodity Balance Report
- 19) Outturn Report
- 20) Transporters Transactions Report

SECOND SCALE READING

- Scale reading window can only be accessed on computer where weighbridge scale is connected
- Rights must be granted for user to perform scale reading procedure
- Depending on the type of scale reading procedure. There is often mandatory information required

System Overall Security Features

- Rights must be granted for user to access the system
- All user activities in the system are captured
- Users are restricted by the system to granted rights
- System [weighbridge] will only execute transactions(processes), defined in administration
- System assume transaction to be complete if In-Bound and Out-bound trucks weights are captured
- Incomplete transaction trucks, remains in system waiting pool for however long, unless otherwise
- New Truck scale reading can only be captured into the system, if no incomplete transaction exist
- System performs necessary background checks and preparation for that specific transaction
- System is fully integrated and linked, no in between manual process in the system is allowed
- All transactions and process supporting documents are generated by the system
- All back office activities such as posting stock movements, are executed in real time by the system

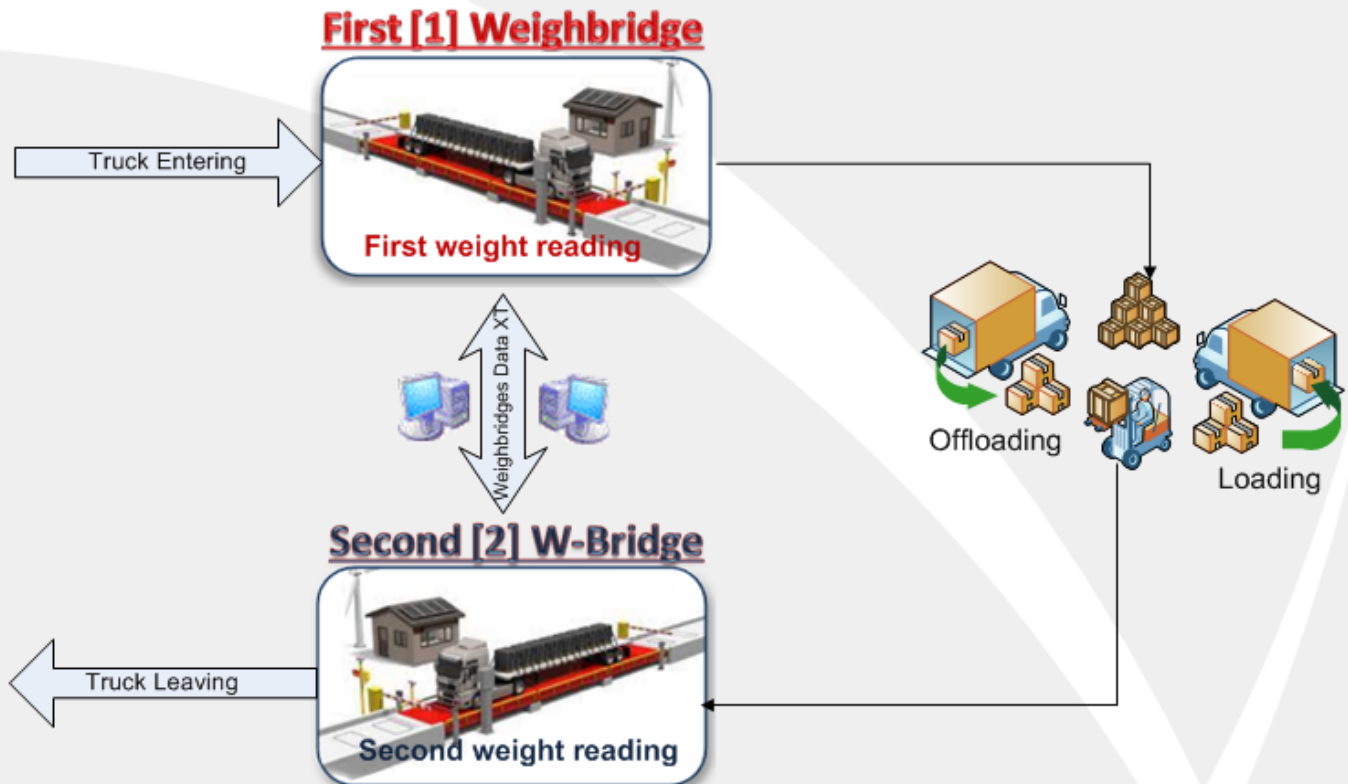

License Plate Capturing Camera

As part of system security Vehicle License Plate Capturing Camera [IP Camera] can be implemented and be integrated into the weighbridge core system, making it difficult for weighbridge operators to make errors in entering vehicle license registration number

ABOUT MULTIPLE WEIGHBRIDGES

- - Multiple weighbridge share truck weights readings information on complementary basis
- - System applies gross and tare weight accordingly
- - If one weighbridge fails, other weighbridge takes over and captures both weights reading
- - Any incomplete transaction from any weighbridge will remain pending in all weighbridges
- - This implementation accommodates big volumes, hence reduces congestion or constraints.
- - With this implementation We can be fairly certain of uninterrupted business activities
- - It helps to implement elimination of biased or fraudulent activities
- - This implementation eliminates dependency on particular individual and equipment
- - Multiple weighbridge implementation can help to ascertain and authenticate weight
- - More than 2 weighbridges can be attached to the system
